

Valmet PQV basic course

This course provides basic knowledge of operating concepts of Valmet PQV and the system structure and hardware.

Objective

After completing the course the participant has basic knowledge of the system and will be able to operate the Valmet PQV System.

Target group

All persons working with Valmet PQV System.

Prerequisite

Knowledge of the process

Course duration

1 day

Course limit

8 attendees

Benefits

Through Valmet's professional training programs, either standard courses or tailored to your specific needs, you will have optimized competences available in your organization. Together we make a development plan for your personnel based on your business needs, and deliver the agreed training flexibly and effectively.

Optimized competence development enables

- better utilization of features in the automation and control solutions
- proper installation, start-up, operation and maintenance of the solutions and equipment
- improved knowledge of product-related safety and environmental issues
- better employee motivation

The results are typically visible as higher productivity, plant availability, improvements in end product quality, time and material savings.
