

# Valmet PQV operation course

This course provides an overview of Valmet PQV system, hardware and functionalities. This training is done typically as operation training during the project start-up phase. Course program is tailored according to project scope and customer needs.

## Objective

You will learn basic operation functions and features of Valmet PQV system in production use.

## Target group

Operators

## Prerequisite

Knowledge of the process itself  
Knowledge of control system operation

## Course duration

0,5-1 day

## Course limit

Max. 8 attendees

## Benefits

Through Valmet's professional training programs, either standard courses or tailored to your specific needs, you will have optimized competences available in your organization. Together we make a development plan for your personnel based on your business needs, and deliver the agreed training flexibly and effectively.

Optimized competence development enables

- better utilization of features in the automation and control solutions
- proper installation, start-up, operation and maintenance of the solutions and equipment
- improved knowledge of product-related safety and environmental issues
- better employee motivation

The results are typically visible as higher productivity, plant availability, improvements in end product quality, time and material savings.
